

Instructions for the tutorial

Inside the zip folder 'NHQM Tutorial.zip', you will find the tutorial tasks in the file 'tutorial.pdf' and matlab files (with file extension '.m'). For doing the tutorial tasks, you should use different functions and run them in matlab. In order to run these functions, you have to copy the matlab files (from the zip folder) to a directory in your computer and then change the directory from where the matlab run to the directory with the files. Namely, to change the path circled at red:

to the path of the directory where you copy the matlab files.
